# SITUATION SUMMARY

## Cal OES Activation Status

State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

### **Oroville Dam Auxiliary Spillway Incident**

On 05/08/17 at 0928 hours the California State Warning Center (CSWC) was advised by the Department of Water Resources (DWR) that they will begin the scheduled increase in flows to the Feather River on 05/10/17 at 0500 hours.

- Total flow will gradually increase from 7,750 cfs to approximately 30,000 cfs by 1130 hours.
- The Oroville Dam Flood Control Spillway flow will increase to 30,000 cfs.
- Hyatt Power Plant will be operated as needed to meet ramping and storage demands.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 05/11/17 at 0600 hours](#):

- Inflow: [19,724](#) cfs.
- Outflow: [30,131](#) cfs.
- The current lake elevation is [847.54](#) feet.

### **Mission Tasking**

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – On Scene.

# **SITUATION SUMMARY**

## **2017 February Storms**

### **Cal OES Coastal Region**

#### **Pfeiffer Bridge Incident, Monterey County**

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

Per the Cal OES Coastal Duty Officer (CDO), as of 04/27/17, Hwy 1 from the south is closed at Ragged Point and is open at specific intervals to local traffic only. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

#### **River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:**

- Solano County: Sacramento River at Rio Vista

### **Cal OES Inland Region**

#### **River Forecast - The following rivers are forecast to meet or exceed Flood stage:**

##### **Placer County:**

- Merced River – Yosemite at Pohono Bridge is forecast to be at flood stage at 10.6 feet on 05/11/17 at 0500 hours.
  - Potential Impacts: Flood Stage. Water tops the swinging bridge downstream from Chapel Meadow. Overflow from Woski Pond floods access road (Northside Drive) leading out of the west entrance of the park. At this time the river forecast to continue receding.

#### **River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:**

- Placer County: Truckee River at Truckee
- Alpine County: West Fork Carson River at Woodfords, East Fork Carson River at Markleeville
- San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto
- Merced County: Merced River at Stevinson

# WEATHER OF CONCERN

## Weather of Concern

- A series of low pressure systems will bring gusty winds to portions of California Friday through Saturday night.

## **Active Weather Warnings, Watches and Advisories by County:**

- [http://www.wrh.noaa.gov/sto/brief/www\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php) - Temporarily unavailable.
- <https://alerts-v2.weather.gov/counties/CA>

# **WEATHER SYNOPSIS BY REGION**

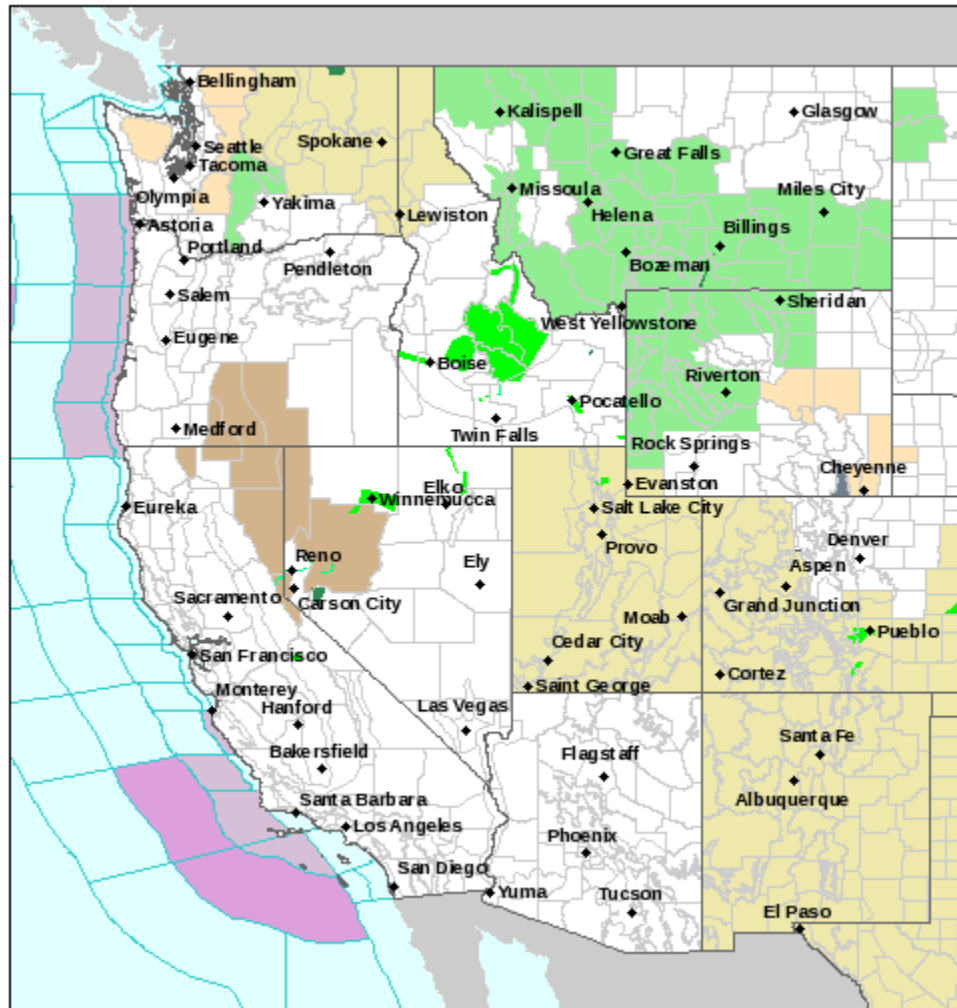

## **NORTHERN CALIFORNIA**

Deep low pressure trough in the Gulf of Alaska will be the main weather influence on the weather throughout the region over the next several days. Several waves of light showers and isolated thunderstorms and gusty southwest winds will move through the region between today and next Monday. Cooler than normal weather is expected for the next week or more. More light rain showers and isolated thunderstorms are possible tomorrow through Monday, with chances greater in northern areas. Snow levels will start out above 7000 feet, but drop to as low as 4000 feet by the end of this week. The closed-low core of the trough will be moving across the region on Tuesday and Wednesday with widespread rain. At this time it appears that cool, wet, unsettled weather could continue into late May.

## **SOUTHERN CALIFORNIA**

A weak ridge of high pressure over California will bring warming to the deserts through today, but onshore flow and a deep marine layer will keep temperatures near to a little below normal from the mountains westward. Maximum temperatures will remain in the 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys. A Pacific trough will form over the West Coast bringing a little below normal temperatures to the entire region Friday through the middle of next week. This trough will also bring westerly winds of 20 to 30 mph with gusts to 50 mph to the wind prone mountain and desert areas this afternoon through the middle of next week. Isolated afternoon showers and thunderstorms will be possible over the Sierra Monday through the middle of next week. Minimum humidity will be mainly above 30% away from the deserts through the middle of next week.
